

This collection presents critical environmental problems with respect to their intersection with culture and religion in Indonesia, such as water resource management, conservation, and political ecology. Scholars from the region ground investigation in ethnographic field studies that represent diverse communities, including Indigenous perspectives from across the archipelago. The discussion is forward-looking and sophisticated, offering a meaningful and critical engagement with the field of religion and ecology.

Anna M. Gade, Professor of Environmental Studies, University of Wisconsin, Madison, United States.

Zainal Abidin Bagir, Graduate School, Universitas Gadjah Mada; Indonesian Consortium for Religious Studies, Yogyakarta, Indonesia.

Michael S. Northcott is Emeritus Professor, Faculty of Divinity, University of Edinburgh, United Kingdom.

Frans Wijsen, Professor of empirical and practical religious studies, Radboud University, The Netherlands.

The Nijmegen Studies in Development and Cultural Change are published by the Nijmegen Interdisciplinary Centre for Development and Cultural Change (www.ru.nl/niccos). This Centre was established in 1989 by the Board of Governors of the Radboud University Nijmegen in order to stimulate and coordinate research and related activities in the above mentioned field of enquiry.
